OFFICIAL LETTER

Date of Receipt: May 11, 1992

From: NATIONAL BUREAU OF STANDARDS
MINISTRY OF ECONOMIC AFFAIRS

To: LAM RESEARCH CORPORATION
c/o: PATRICK I.C. YUN & THOMAS Q.T. TSAI, patent attorneys

SUBJECT

It was found during examination that Patent Application no. 80101614 still requires some clarifications or amendments (as indicated hereunder). The Applicant is invited to submit in duplicate rebuttal evidence and supplementary observations within sixty (60) days of the day following the date of receipt of this Official Letter. The Applicant may indicate in the Response his wish for a personal interview or demonstration with the Examiner. If deemed necessary and so granted by the Bureau, the time and place of the interview shall be arranged separately. Failure to reply to this Letter by this time will result in the rejection of this application. **The deadline cannot be extended.**

CONTENTS

1. This patent application is for an electrode assembly for a plasma reactor comprising an electrode plate selectively made of pure material and an electrically and thermally conductive support frame bonded on the back surface of the electrode plate. The bonding layer is made of low vapor pressure material and can suitably remove the stress caused by thermal cycling.

2. The essence of this invention resides in improving the electrode assembly. Hence, the Claims should only be limited to the aspect of electrode assembly, such as the electrode plate per se, support frame, connected layer material, etc. The sets of claims, Claims 1-9 and Claims 17-23, should each be merged so as to disclose the features of this invention. Furthermore, indefinite words such as "substantially" should be deleted. Claim 31 should be revised to a dependent format.

3. The apparatus disclosed in this invention utilizes the technical concepts embodied in the following publications, and as such it cannot be deemed a new invention:

- (a) P 346055A
- (b) WO 8902695A
- (c) JP 6191033A
- (d) US 4600563
- (e) EP 188208A

4. This invention should provide a definite example and data to attest to the productivity and industrial worth of the use of the claimed apparatus.
